hygienic door handle

*Reduce* **WASHROOM COSTS**  
*while* **PROTECTING** *your* **HEALTH**  
& *SAVING* *the* **PLANET!**

With the threat of germ cross-contamination more globally recognized than ever before, the latest survival strategy among today's Away-From-Home patrons has become simple: "Don't touch anything!" Yet, with all the modern "touch-free" advances in restroom hygiene, it's hard to grasp why the door handle has been so universally ignored. Until now. Enter Purleve™ Hygienic Door Handle, the innovative and proprietary solution that offers your patrons a cleaner way out... every touch, every time. As a bonus, the Hygienic Door Handle supports in the reduction of paper towel consumption and lost employee productivity due to illness.

The number one method to exiting the washroom 'clean' is by wasting numerous paper towels when grabbing the dirty door handle. This results in high costs and other washroom issues:

- Cost of paper towels consumed and the Labor to replenish.
- High cost paper towels often end up on the washroom floor which leaves an unsightly dirty and wet mess.
- Time and costs to clean up the unsightly mess of paper towels on the floor.
- Trash bins filling up quickly with volume intensive paper towels.
- Added cost of an extra trash bin by the door.
- Time and cost to remove and replace trash bins.

In addition to the high associated costs of paper towels, the excessive waste is troubling to our Planet. In short, paper towels cannot be recycled, consume precious resources (20,000 Gallons of water and 17 trees to make just one ton of paper towels) and use excessive landfill space.

The high cost of cross – contamination also relates to your employee's health. According to the National Center for Health Statistics (National Health Interview Survey, 2004): 'Not only is there heightened awareness about the dangers of cross –contamination in food service, healthcare, office buildings and other public settings, American workers miss approximately 578 million work days a year due to illness. That is billions in lost productivity.' The Purleve Hygienic Door Handle is another 'must have' solution to reducing the amount of cross contamination in the washroom and improved resulting health of your employees.

Other Key Benefits of the Purleve Hygienic Door Handle System:

- Advances a sleeve with Microban® antimicrobial protection over the handle after every use – Microban protection inhibits the growth of odor causing bacteria, keeping the sleeves cleaner for continuous protection.
- Provides superior facility image
- Low maintenance
- Green Product - Recyclable Refill
- Thousands of uses per refill

Purleve™ installs easily, replacing any standard Push-Pull and Latch handle, and offers your patrons the simple-to-use, cost-effective and "Green" sanitary solution they have been reaching for.
