

BioPūr™ Premium

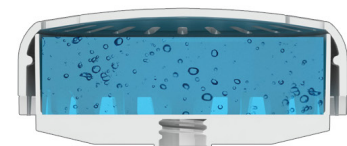

A CLEANER WORLD IS WITHIN REACH

The Pūrleve™ BioPūr™ Premium kits are developed with a proprietary gel formula and composed of specially formulated enzymes capable of degrading uric acid, the leading cause of odors in urinals. The BioPūr™ Premium contains powerful enzymatic cleaning agents and fragrance, proven to maintain clear and odor free urinal traps and lines by degrading the crystalline structure of uric acid that can slow the drain system and standard traps. This gel formula is designed to be longer lasting, safer and less damaging than the conventional pCDB chemicals used in most urinal blocks.

BioPūr™ Premium benefits!

The BioPūr™ Premium kits are cost efficient, and help save money by prolonging the use of the Pūrleve™ EnviroSeal™ and minimizes cleaning and maintenance of the urinal.

- Specially formulated with a proprietary gel formula.
- Easy to replace with no messy residue.
- Enzymes and cleaning agents are dispensed with every use.
- Formula helps prolong the onset of and prevent potential clogging.
- Formula helps prevent plugging by targeting the debris commonly found in a urinal trap, breaking it down continuously and preventing deposits.
- With regular use, the formula used will carry through the urinal trap helping to clean up muck-laden sewer pipes further downstream.
- Unlike traditional pucks, this unique gel formula will last two months (even in high use urinals!)
- Formula does not contain par-dichlorobenzene or other hazardous ingredients.
- Formula does not contain bacteria or micro-organisms, so it can be used in all environments and global markets.
