

Pürleve BioFresh Cleaner & Deodorizer

A CLEANER WORLD IS WITHIN REACH

The innovative Pürleve BioFresh both sanitizes and deodorizes while providing optimal convenience and ease of dispenser installment and refill replacement. The BioFresh Refill's neutralizers knock-out malodors in the air leaving the restroom clean, fresh and comfortable. The BioFresh Biodegradable surfactants de-scale and help prevent stains and organic build-up in the fixture and trap. Last, with the appropriate connection accessory kit, the dispenser can be leveraged as either an 'In Line' solution or 'Over the Urinal/Toilet' drip system.

BioFresh Cleaner & Deodorizer

BioFresh Cleaner & Deodorizer Benefits!

Enhances Cleanliness & Image Round-the-Clock

- Dramatically improves the overall cleanliness and image of any washroom.
- Powerful BioPür formulas eliminate the breeding ground of bacteria and odors at the source.

Easy In-Line Installation

- Allows cleaning solution to reach the hard to clean areas, such as rim holes, ensuring that the whole fixture is cleaned.
- No need to shut off the water.
- Easy drill-through chrome connection kit.
- Emanator (wicks) are automatically installed and removed with each refill. No separate processes and no hand exposure to fragrance.

World-Class Reliability

- Proven programmable dispensing technology.
- Delivers consistent metered dosage of BioPür Cleaner to prevent build up of calcium on pipes and scaling.

Environmentally Efficient & Cost Effective

- Controlled dispensing eliminates over use and places less chemicals into waste streams.
- Industry leading battery life up to 3 years (4 "C" Cell alkaline batteries.)
- Refill is all plastic which allows for ease of recycling.

Pürleve BioFresh Cleaner & Deodorizer

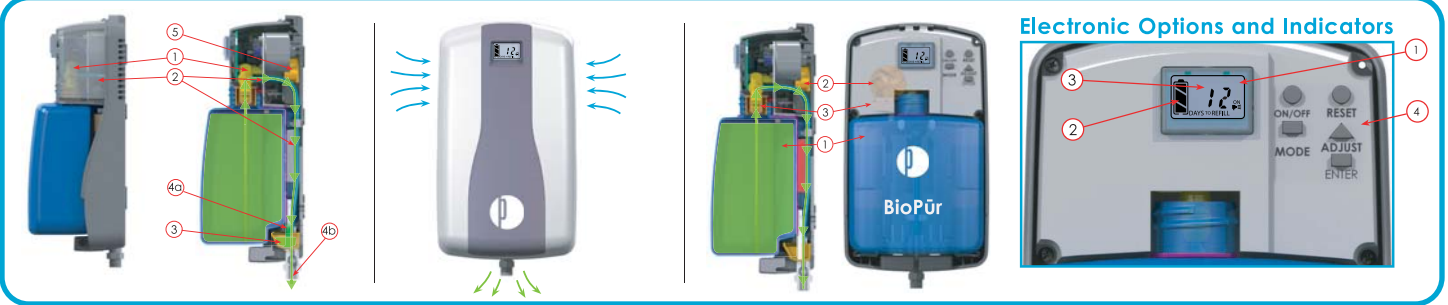

Pürleve BioFresh 3 Installations for Pürleve Hybrid Storm

Pürleve's BioFresh System delivers revolutionary cleaner and deodorizer and can be leveraged with the entire Hybrid STORM series of urinals. The system supports the daily maintenance of all plumbing and can 'cover up' any unwanted washroom odors. The Pürleve system provides optimal convenience, ease of dispenser installation and refill replacement. In addition, with the appropriate connection accessory kit, the dispenser can be leveraged as either an 'In Line' solution (See AutoFlush and Manual Images above) or 'Over the Urinal/Toilet' (see 'Seco' urinal above) drip system.

Key Electronic Components and Features

Pumping, Cleaning and Deodorizing Overview

Pumping, Cleaning & Deodorizing Overview

1. System activates metered Pump in the dispenser. The timing of the PUMP is predetermined by duration of refill. LCD allows for easy changes to the cleaning and deodorizing schedules and allows for a 30, 60 and 90 day refill turn options.
2. Cleaner & Fragrance travels through tube.
3. Both Cleaner and Fragrance travel to the RESERVOIR.
4. The Fragrance finds its way to the proprietary smart wick (s) (4A) while the CLEANER continues down the tubes (4B) for proper pipe / urinal / toilet cleaning and de-scaling.
5. Fan Activated at predetermined rate to optimize movement of fragrance in the environment.

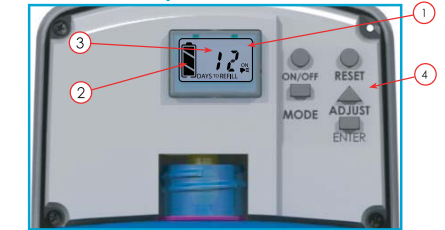

The SMART FAN pulls in the AIR (BLUE) from various cover vents on the top RIGHT and LEFT of back housing than PUSHES the FRAGRANCED AIR down the back center of the dispenser over the SMART WICK, which is already 'wicking - out the fragrance' and then sends it OUT the cover vents on the bottom (Green) to optimize the washroom experience.

The Smart LCD Electronics ensure the proprietary designed FAN is spinning at the correct speeds and time frames (duration of spin and timing On / OFF intervals of spin) to ensure the optimal level of fragrance is dispersed.

Key Electronics / Features

1. 4 - C Alkaline Cells (1 to 3 year battery life depending on refill setting)
2. Smart Fan / Motor
3. Auto Refill Reset Switch - Each time a new refill placed, the system will automatically re-set.

Electronic Options and Indicators

Electronic Options and Indicators

1. LCD Display and Associated Buttons - Components allow for ease of installation for all use patterns (Day / Night, up to 90 days of Refill use, Specific On and Off Hours, etc).

Other Features:

2. Visual Battery Gauge
3. Days to Refill Display
4. Flexible Programming Options using Buttons:
 - 8, 12, 16, or 24 hour operation
 - 5, 6, 7 day operation
 - Programmable start time setting
