

Pürleve Feminine Hygiene Bin

A CLEANER WORLD IS WITHIN REACH

The innovative and proprietary Pürleve™ Feminine Hygiene Bin was designed to optimize performance and maximize hygiene. In addition, it ensures servicing is ‘fast and easy’ and streamlines line choices for global distribution to minimize procurement complexities yet maximize customer needs. Specifically, the highly adaptable system allows one to convert the manual open ‘base model’ (small on the wall or large on the floor) to one that offers a ‘no touch’ cover and/or odor control fragrance system. These features along with the innovative cover design, which maximizes capacity for waste, ensures the global customer has a robust solution for any environment.

Pürleve Feminine Hygiene Bin

Small ‘On-The-Wall’ Unit

- Volume of usable capacity - 6.5 liters
- Bin can be sold as a Manual open lid or No Touch system with an electronic ‘power’ module accessory.
- Unit offers an optional Fragrance Module System as an Accessory.
- Bin can be sold with Pürleve™ Biodegradable and Enzyme enriched liners or NO liner, and all parts can be easily removed for servicing / cleaning.

Large ‘On the Floor’ Unit

- Volume of usable capacity - 16.5 liters
- Accessory packs allow for four (4) options:
 1. Automatic Open Power Module (no touch)
 2. Foot Pedal Accessory Pack (no touch)
 3. Manual Open (touch required)
 4. Fragrance Module
- Bin can rest on floor with Base Accessory or be hung on wall
- Bin can be sold with Pürleve™ Biodegradable and Enzyme enriched liners or No liner, and all parts can be easily removed for servicing / cleaning.

- Manual or Automatic Cover options available.
- Fragrance options available in both Manual and Automatic Versions.
- Patented Manual Fan system to optimize fragrance dispersion with no batteries.
- Innovated fragrance systems used to mask all malodors.
- Easy to install and service.
- Low profile to ensure it can be installed in small urinal stalls.
- Can also be used to collect general garbage and / or diaper deposits.

Pürleve Feminine Hygiene Bin

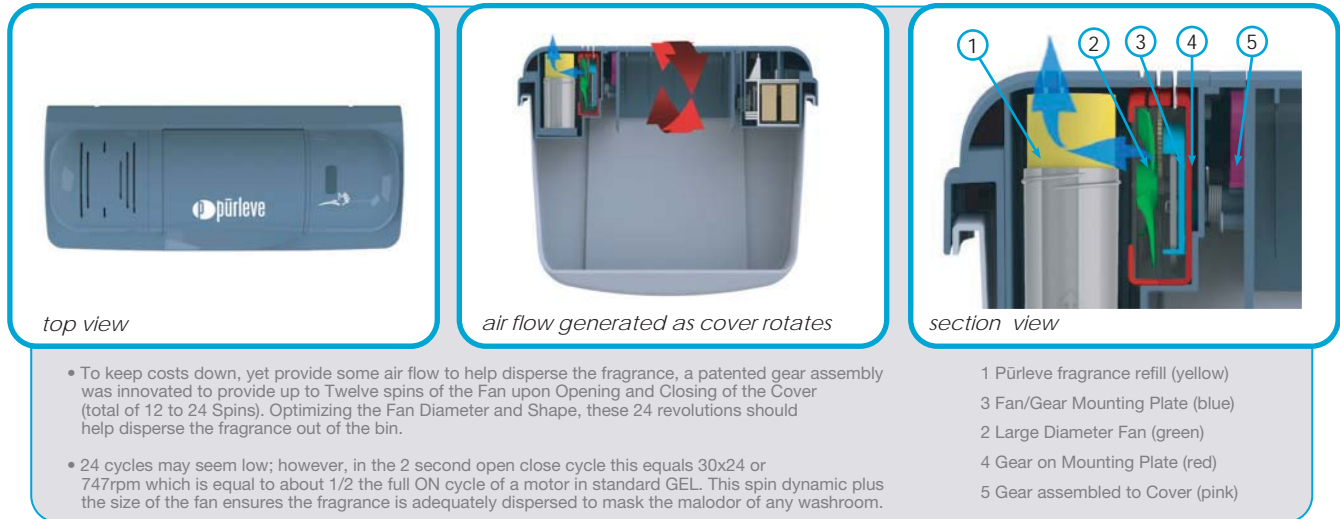

AutoFem Bin: Overview of the Process to Convert Bin to a No-Touch system. (shown without Fragrance System; however, works the same for both)

Fragrance System Overview

Pürleve™ offers an 'fragrance module' that can be Snapped into the standard Cover design. The easy in and out of the module allows for ease of transfer for service companies (those that clean, collect and clean bins) and ease to replace Pürleve Fragrance Cartridge when required. The Fragrance system provides up to 60 Days of performance.

Fragrance Module Insert and Removal Process (for servicing or replacing a passive fragrance system)
