

**A TOUCH OF CLEAN,
A WORLD OF OPPORTUNITY**

Introducing Pūrleve™, the innovative door handle solution that offers a clean, sanitary experience for every user . . . *every touch, every time*. Employing a proprietary Automatic Sleeve Dispenser (ASD) technology, Pūrleve automatically advances an antibacterial sleeve over the handle with every use, so visitors to restrooms and other public areas are no longer affected by the questionable hygiene habits of all the people who have gone before them.

As the final piece in an increasingly in-demand collection of advanced, automated restroom fixtures, Pūrleve aids in improving public hygiene, minimizing cross-contamination and promoting the image of a clean, healthy environment among guests. In doing so, Pūrleve swings open the door of opportunity for proprietors in Away-From-Home environments all over the world. An opportunity to offer cleaner, safer, and more inviting environments for their patrons. An opportunity now easily within reach.

A cleaner world is within reach.

hygienic door handle

A cleaner world is within reach.

WHAT'S YOUR EXIT STRATEGY?

80% of infectious illnesses are transmitted by touch. So in a world where an estimated 30% of visitors to public restrooms don't wash their hands afterwards, who wants to touch the shared handle that offers the only form of exit from a public facility? For today's more discriminating patrons, the latest survival strategy in any Away-From-Home environment has become simple: "Don't touch anything!"

Modern advances in restroom hygiene, including touch-free flushers, faucets and soap dispensers, have greatly aided the cause. Yet in the end, all the dedicated touch avoidance goes right down the drain, compromised by the one final area of germ contamination: the door handle. Alternatives are generally awkward, messy and expensive, leaving patrons and proprietors with no way out of a sticky situation. Until now.

AN OPEN DOOR POLICY

From the bustling mall restroom to the quaint neighborhood bistro, the busy airport to the high-end office complex, germs have no particular allegiance to their surroundings. Any old (or new) handle will do. Fortunately, Pürleve is up to the challenge. Our proprietary ASD technology provides patrons of any environment a pure alternative to the contaminated handle standing between them and a clean escape. The simplicity of the product results in a non-existent learning curve for patrons, as Pürleve door handles function and react exactly as regular door handles. With three distinct categories to choose from, there's a Pürleve product that fits on any kind of door, in every kind of place.

Each of our product categories support Pürleve's environmentally friendly corporate stance by incorporating efficient power systems to drive the ASD technology. Plus with recyclable refills and almost zero waste produced, Pürleve is clearly a greener way to go.

PUSH-PULL

For Push Pull doors or doors with no private use locks. Ideal for high-traffic environments. Allows for thousands of clean-touch uses per refill.

LOCKABLE

For doors with rotating lock handles. Ideal for private room use. Allows for thousands of clean-touch uses per refill.

LATCH

For doors with rotating handles, but no locks. Ideal for environments where door handles rotate to release the latch. Allows for thousands of clean-touch uses per refill.

SMARTER SANITATION, INSIDE AND OUT

Innovative ASD technology equips Pürleve with the brains to know when its handle has been grasped and the smarts to do something about it—namely, advance its self-contained sleeve of antibacterial-treated material to fully cover the handle and provide each user a sanitary touch. Available in three different categories, each with an attractive satin nickel cover finish, Pürleve is simply the smarter choice for better hygiene.

DISPENSER

All-metal handle assembly provides strong, durable performance

Both dispenser cover and sleeve material allow for unique branding opportunities

Proprietary ASD technology advances antibacterial sleeve, aiding in reduced bacteria growth and offering a sanitary user experience

Electronic sensing ensures that product automatically advances after every use, guaranteeing a clean touch for each and every user

Proprietary lock protects against intrusion

Included "Key Lock Out" designs provide secure identification capabilities

High capacity design and efficient power sources reduce maintenance and lower cost

REFILL

Easy-to-install antimicrobial (Microban) refills are recyclable, using no paper and producing almost zero waste

Thousands of uses with each refill saves time and money

Better health. Better image. Better business. Better world. Clean is better, all the way around. And Pürleve helps to make "clean" the last word in restroom hygiene.
